Brief Bio:

Dr Brian Rahm received his masters from UC Berkeley and doctorate from Cornell University, where he worked on remediation of groundwater contamination. Since then, he moved to New Zealand and spent a year engaged in climate change policy analysis for the capital city, Wellington, and has also performed research on greenhouse gas emissions from wastewater treatment plants. He is currently with the New York State Water Resources Institute where he is engaged in education and research on a variety of topics, including the impact of shale gas development on water resources, and aging waste water infrastructure.
